Experience

Freelance, New York, NY
Web Development, 2016 - Present

+ Designed and developed web pages and apps for small business and start-up clients — both project-based and ongoing

+ Helped to produce a variety of content and managed various CMS solutions including WordPress and Shopify

+ Executed projects from initial design, through database architecture and API development, to front-end implementation

General Assembly, New York, NY
Teaching Assistant, 2016

+ Graded daily homework assignments in the form of small development projects for classes of around thirty students

+ Answered student questions pertaining to a wide variety of web technologies such as Node.js and Ruby on Rails

+ Ensured that instructors remained apprised of individual progress while highlighting areas in need of increased focus

Accruent, Austin, TX
Functional Consultant, 2013 - 2014

+ Worked alongside clients and developers to outline functional requirements and configure custom software platforms

+ Coordinated with numerous stakeholders during simultaneous implementations from initial sale to ongoing support handoff

+ Managed and migrated large customer databases using SQL, FTP, as well as various internal tools

+ Conducted on-site trainings for existing and potential clients on a range of software products

+ Photoshop

+ Client Services

+ UI / UX Design

+ Writing   + Editing

+ Content Strategy

+ Excel   +Office   +CRM

Additional Experience

Accruent, Austin, TX
Market Research Intern, 2013

Austin Appliance, Austin, TX
Operations and Sales, 2012 - 2013

iEnergizer, Austin, TX
Support Specialist, 2011

Previously, I have worked in various positions related to professional services and marketing. My early career provided a foundation in client communications and support, as well as the organization of a variety of team-based tasks in both small and large organizations. It also led to me discovering an interest in working in the technology sector in increasingly technical roles.

Education

General Assembly, New York, NY
Web Development Immersive, 2015

University of Texas, Austin, TX
BA English Literature, 2011

In university, I pursued a passion for storytelling, studying both literature and journalism. I also worked on the school paper as a reporter. Recently, I attended the Web Development Immersive course at General Assembly where I learned the skills needed to make web applications.
